

PLATINUM SHIELD

Undercoat Protection

Canadian roads and weather conditions are tough on your RV's under-carriage. Disturbing road noise and vibrations can make a long road trip even longer and more tiring.

Platinum Shield Undercoat Protection

is specially formulated for exposed high impact areas.

This pliable product will not crack, peel, or chip. It seals out moisture and protects your under-carriage components from road debris. It also provides insulation from extreme temperatures and reduces disturbing road noise, offering you a quieter more enjoyable ride.

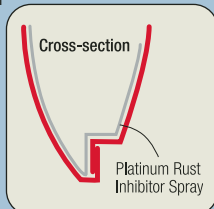

PLATINUM SHIELD

Rust Protection

Rust not only ruins the appearance and value of your RV, it shortens its life and structural integrity. Today's RV's have many hard to reach places where moisture can collect causing rust formation.

Platinum Shield Rust Inhibitor Spray Protection

seals your RV's inner body metal surfaces and stops rust perforation from the inside out. The high-pressure spray application ensures that all inner body panels are treated without drilling any holes.

First Canadian Protection Products

If at any point a Platinum Shield product fails to perform as guaranteed, we'll repair or replace the damaged area at no cost to you.
